Windows Server 2012 Essentials Free Download is the perfect solution for small businesses, offering essential business-class server capabilities at affordable rates. Essentials can help you: Provide your small business with a central point of management and control. Protect your network and applications from harm and reduce your need to invest in incident response. Easily manage and use your desktop PCs and mobile devices using the Microsoft Office 2013 apps. Use specialized apps that simplify and accelerate your business processes, including a virtualized version of OneDrive. Provide your small business with a central point of management and control: The Essentials security model provides the most powerful set of security enhancements in Windows Server 2012. This lets you easily apply security in a central manner to your applications and operating system. With Essentials you can use Microsoft Deployment Toolkit to easily install the server and then deploy an application or feature. You can also deploy applications, patches, or features in minutes via a server-hosted App-V-compatible deployment service. As a result, you'll need fewer people to manage your server and applications. Essentials Server makes it easy to deploy server software and patches centrally by leveraging Microsoft System Center 2012 R2 Essentials to install the server and deployment tools, and then use System Center to deploy software, apps, and deployment tools in minutes. Protect your network and applications from harm and reduce your need to invest in incident response: The Essentials security model includes the Forefront Unified Communications Manager, Forefront TMG, Forefront Security for Exchange, Forefront Security for SharePoint, Forefront Online Protection Platform, and Microsoft Forefront Threat Management Gateway and provides a variety of defense-in-depth capabilities to help defend against attacks on your network, and data in your mail and business applications. Forefront Unifies and simplifies threat management, risk, and compliance activities across the Microsoft ecosystem. Forefront TMG delivers firewall and web, email, and Web content security. Forefront Security for Exchange helps protect the email of your business users. Forefront Security for SharePoint helps protect your business assets. Forefront Online Protection Platform provides network, server, application, and Web content security. Microsoft Forefront Threat Management Gateway provides the core security that protects the Exchange, SharePoint, and Office apps for Web and Cloud.
